

1188 Hwy #8, Dundas Ont. L9H 5E1

To whom it may concern,

I thought it would help Joe and Damian if their customers provided letters of reference to help others in making their decision on dealing with Can-Trac Technologies. We at Country Meat Packing have been using iTrace software for some time now and are very happy with it. iTrace not only meets our needs but Can-Trac has provided a number of custom additions to make it fit our particular needs to serve our customers more efficiently. The module design of iTrace software allowed us to buy what we need and saved us from wasting money on having to buy features which would not be needed or used in our operation. We also like the ability to add any of the modules we may need in the future at our discretion. We found that the installation of a new system was a challenge as is anything new but since the software is easy to use and Can-Trac support was there, it didn't take too long for us to have it become our new normal way of operating. Country Meat Packing is a vibrant and growing business and we will be using iTrace and Can-Trac as a tool for our continued growth. I believe that you will get the same benefit from dealing with Can-Trac as we have.

Best regards

Carolyn Prince
